User Management in Active Directory

Task 1: In Active Directory Users and Computers, create a new Organizational Unit (OU) called 'EventPlanners' to represent a team that manages college fests like those seen in BookMyShow.

In ADUC I right-clicked the domain lab.com and chose New > Organizational Unit. I typed the name EventPlanners and left "Protect container from accidental deletion" ticked.

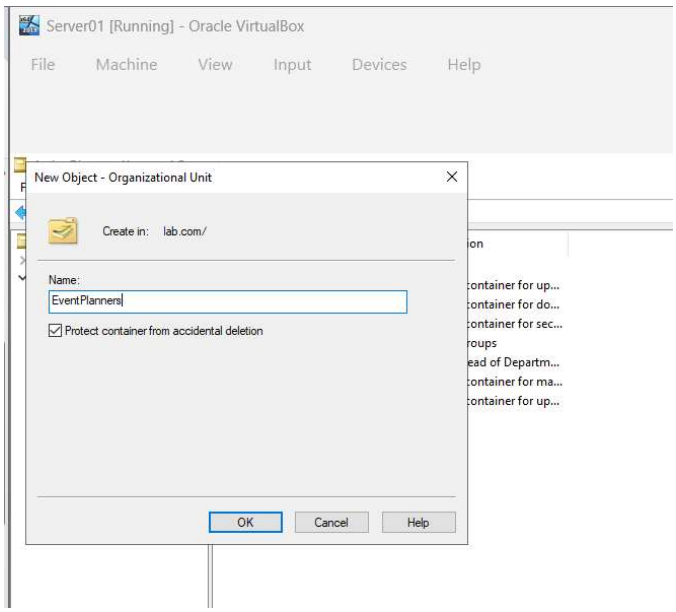

Figure 1: New Object - Organizational Unit, name EventPlanners in lab.com

Task 2:Add three user accounts to the 'EventPlanners' OU with usernames inspired by your favorite IPL cricket players (e.g., viratk, msdhoni, hardikp). Set a strong password for each and ensure 'User must change password at next logon' is enabled.

I right-clicked the EventPlanners OU and chose New > User three times. For each account I entered the name and logon name, then set a password on the password page with "User must change password at next logon" ticked. The final summary page of each wizard confirms the account and that the password must be changed at next logon.

```
virat k     logon: virat.k@lab.com
msdhohni    logon: msdhoni@lab.com
hardik p    logon: hardik.p@lab.com
```

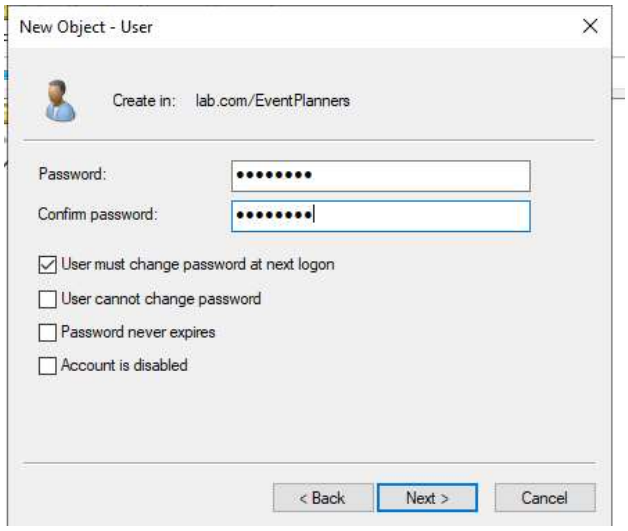

Figure 2: Password page with "User must change password at next logon" ticked

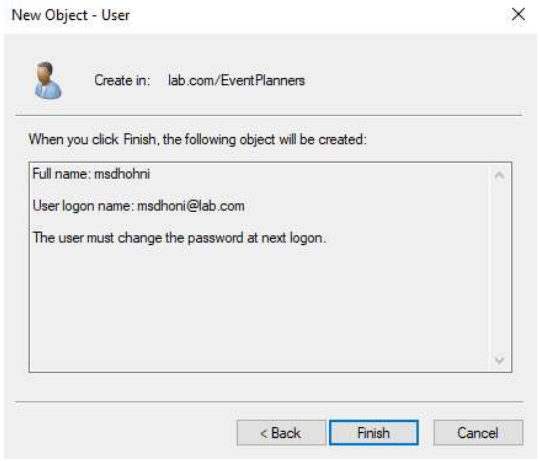

Figure 4: Summary for user msdhohni

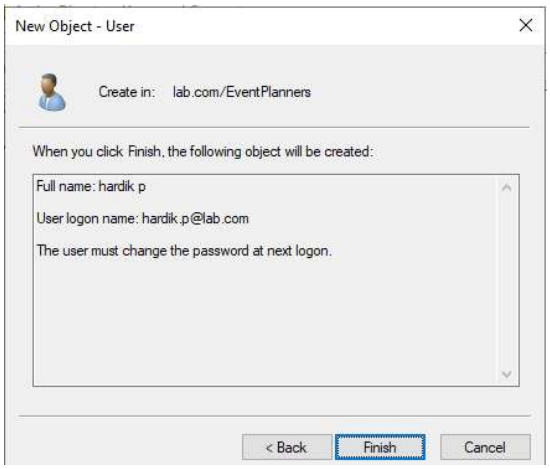

Figure 5: Summary for user hardik p

Task 3: Create a security group named 'FestTicketManagers' inside the 'EventPlanners' OU. Add all three user accounts you created to this group.

In the EventPlanners OU I chose New > Group, named it FestTicketManagers, and selected group type Security (scope Global). I then opened the group Properties, went to the Members tab, clicked Add and selected all three users.

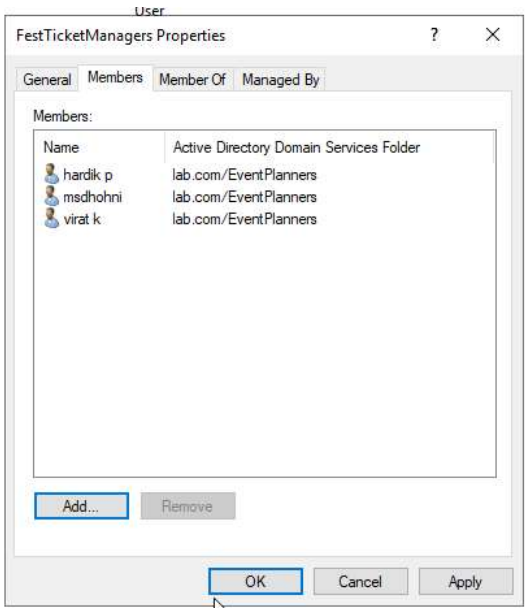

Figure 7: FestTicketManagers Properties, Members tab with hardik p, msdhohni and virat k

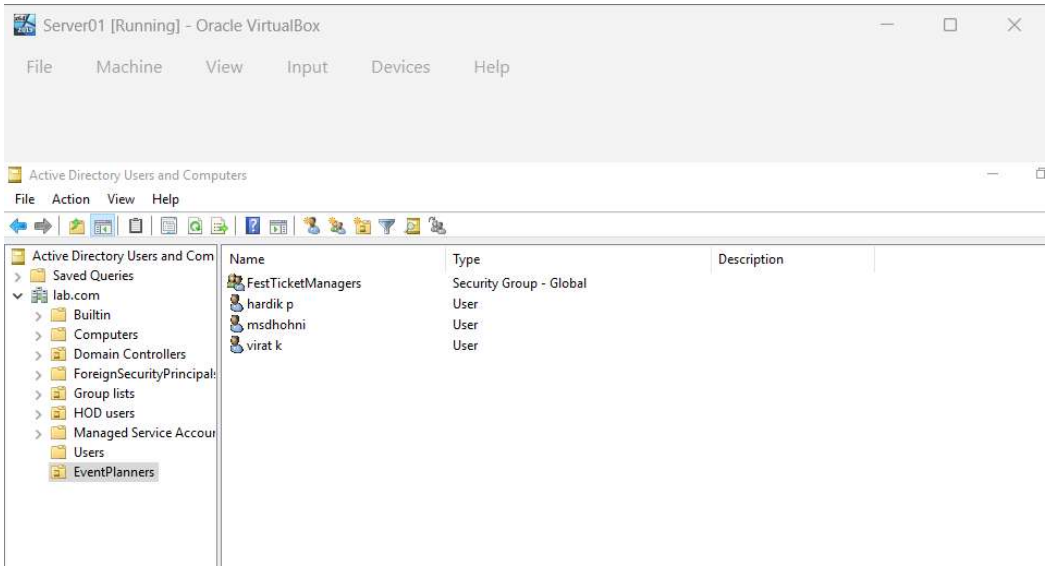

Figure 8: EventPlanners OU showing the group (Security Group - Global) and the three users

Task 4: Rename one of your user accounts in the 'EventPlanners' OU to match your own first name and update their description field to 'Social Media Manager for College Fest'.

I renamed the account hardik p to my own name (Srikant m) and set the Description to "Social Media Manager for College Fest". In the user Properties, the General tab shows the new first name, last name and display name together with the description. The OU list now shows Srikant m with the description.
