

TASK 1

TASK 2:

HDD [HARD DISK DRIVE]	SSD [SOLID-STATE DRIVE]
• Uses spinning magnetic platters & a moving read/write head • Slower read/write speed 80-160 MB/s • Longer load time • Cheaper • Contains mechanical parts Prone to wear • Higher power usage • Audible noise • More vulnerable to shock & vibration	• Uses flash memory chips • Faster read/write speed 200-500 MB/s Better for gaming • Shorter load time • Expensive • No mechanical parts • Lower power usage • Silent operation • More resistant to physical shock
