

Change Desktop Wallpaper and System Language to Hindi or Gujarati on macOS

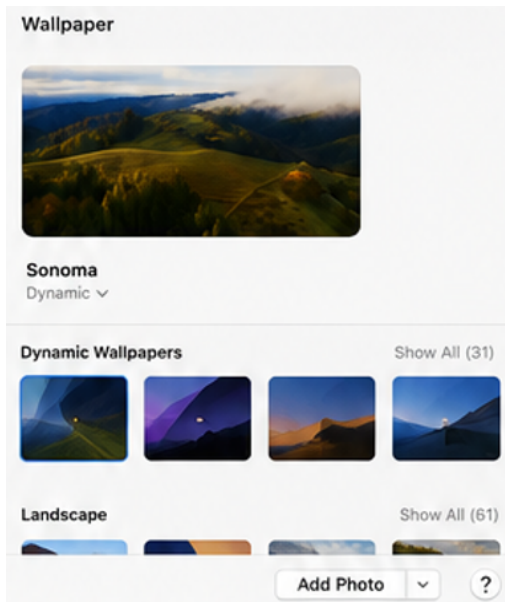

Part 1: Change Desktop Wallpaper

1. Click on the Apple Menu in the top-left corner and choose system settings

2. In System settings, click Wallpaper in the sidebar

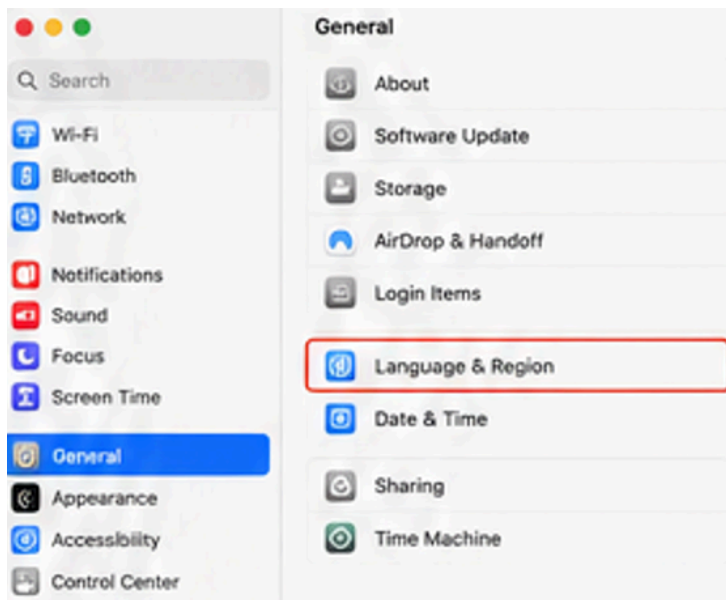

3. Choose a wallpaper from Dynamic wallpapers, landscape or click add photo

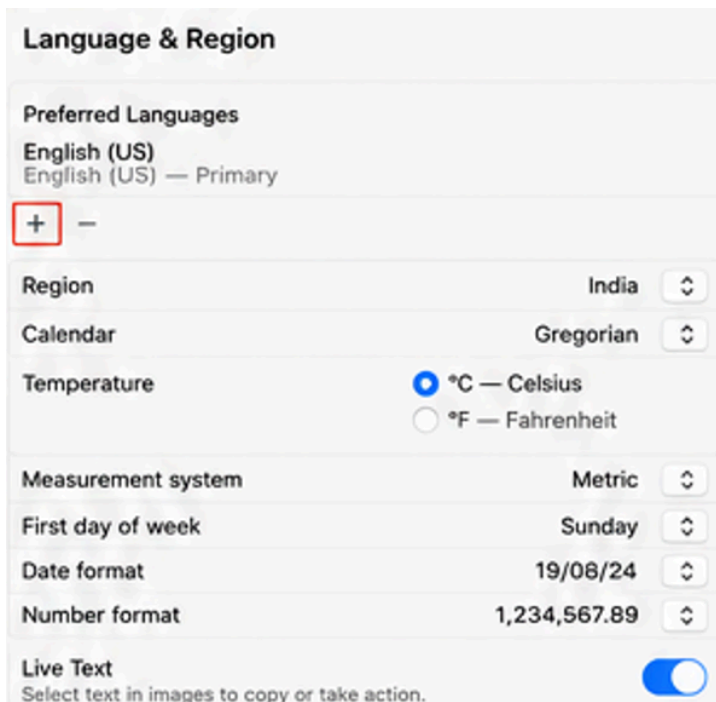

4. The new wallpaper will appear on the desktop

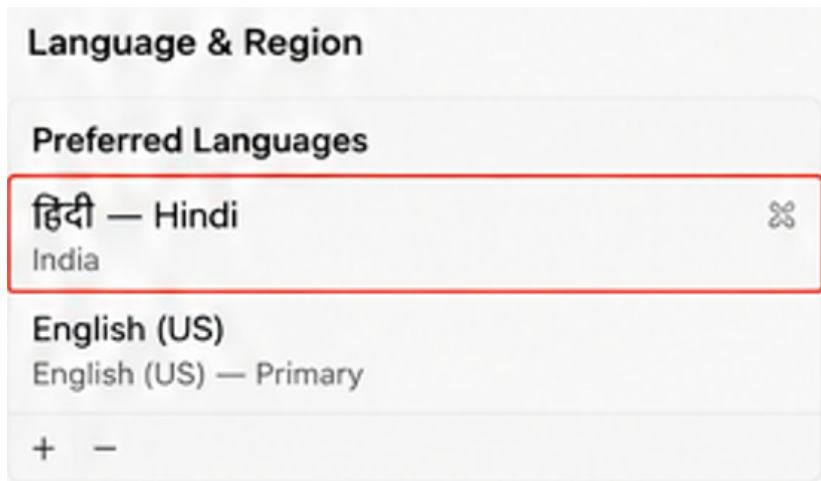

Part 2: Change System Language to Hindi or Gujarati

1. Click Apple menu and choose System settings - Click General in the sidebar - then click Language & Region

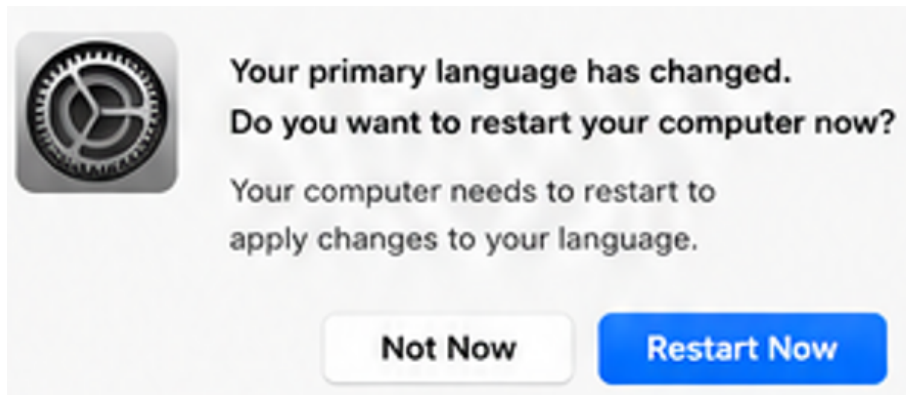

2. In the preferred Languages click the + (plus) button.

3. Search for Hindi and Gujarati one by one and click Add.

4. The Language is added to the List.

5. Drag the preferred language to the Top

6. Restart the PC for changes to take place.
